Journal of Hydrology

Contents of Volume 226

Vol. 226 Nos. 1–2 **DECEMBER 20 1999**

Research papers

Temperature and evaporation dynamics of saline solutions
I. M. Oroud 1

Continuous modeling of intermittent stormflows on a semi-arid agricultural catchment
T. X. Zhu, L. E. Band and R. A. Vertessy 11

Multilinear discrete lag-cascade model for channel routing
L. A. Camacho and M. J. Lees 30

Multi-scale alluvial fan heterogeneity modeled with transition probability geostatistics in a sequence stratigraphic framework
G. S. Weissmann and G. E. Fogg 48

Semi-distributed water balance dynamics in a small boreal forest basin
R. A. Metcalfe and J. M. Buttle 66

The Gumbel mixed model for flood frequency analysis
S. Yue, T. B. M. J. Ouarda, B. Bobée, P. Legendre and P. Bruneau 88

A rainfall and snowmelt runoff modelling approach to flow estimation at ungauged sites in British Columbia
Z. Micovic and M. C. Quick 101

Discussion

Comment on 'Kinetic modelling of microbially-driven redox chemistry of subsurface environments: Coupling transport, microbial metabolism and geochemistry' by K.S. Hunter, Y. Wang and P. van Cappellen
J. Griffioen 121

Book review

Varieties of Fluvial Form; A.J. Miller, A. Gupta
R. B. Rains 125

Vol. 226 Nos. 3–4 **DECEMBER 31 1999**

Special Issue: Analytic-based modeling of groundwater flow

Preface 127

Principles of the analytic element method
O.D.L. Strack 128

A comparative review of analytic and finite difference models used at the Amsterdam Water Supply
T.N. Olsthoorn 139

Analytical element model analysis of the influence of different scenarios for the water level in a future retention basin
J.H.N. Moorman 144

Modelling of the effect of a sea-level rise and land subsidence on the evolution of the groundwater density in the subsoil of the northern part of the Netherlands
J.L. van der Meij and B. Minnema 152

Regional groundwater modeling of the Yucca Mountain site using analytic elements
M. Bakker, E.I. Anderson, T.N. Olsthoorn and O.D.L. Strack 167

The superblock approach for the analytic element method
O.D.L. Strack, I. Janković and R. Barnes 179

A multi-quadric area-sink for analytic element modeling of groundwater flow
O.D.L. Strack and I. Janković 188

An analytic element solution to unconfined flow near partially penetrating wells
K. Luther and H.M. Haitjema 197

Two-dimensional flow through large numbers of circular inhomogeneities
R. Barnes and I. Janković 204
High-order line elements in modeling two-dimensional groundwater flow
I. Janković and R. Barnes 211
Three-dimensional flow through large numbers of spheroidal inhomogeneities
I. Janković and R. Barnes 224
A hyperbolic dispersion equation to model the bounds of a contaminated groundwater body
C. Maas 234
Groundwater flow in a medium with a parquet-type conductivity distribution
A.R. Kacimov, Yu.V. Obnosov and N.D. Yakimov 242
A Cauchy boundary condition for the lumped interaction between an arbitrary number of surface waters and a regional aquifer
W.J. de Lange 250
An analytic-based approach for coupling models for unsaturated and saturated groundwater flow at different scales
J.A.P.H. Vermulst and W.J. De Lange 262

Contents of Volume 226 274
